EDUCATION

SRMIST

2025 - 2027

Master of Technology

THANTHAI PERIYAR GOVT. INSTITUTE OF TECHNOLOGY

2019 – 2023

Bachelor Of Engineering

SKILLS

- AUTO CAD
- ETABS
- STAAD.Pro
- Revit BIM
- Revit Architecture

LANGUAGES

- Tamil – Fluent
- English - Intermediate

ARAVINDAN K

Aspiring Structural Design Engineer

Portfolio: *https://aravindkloki.github.io/Structural-Design-Engineer/*

PROFILE:

An aspiring Structural Design Engineer pursuing M.Tech in Structural Engineering, with foundational knowledge of structural analysis, design principles, and reinforced concrete and steel structures. Interested in developing practical expertise in structural design, detailing, and analysis using industry-standard software.

WORK EXPERIENCE:

TANSAM

Academic Trainer for Diploma Students

July 2024 – March 2025

- Equipped students with Industry 4.0 concepts through practical software applications and modern engineering tools.
- Encouraged innovative problem-solving and technology-driven approaches to real-world industrial challenges.
- Promoted creativity, technical skills, and industry-oriented learning.

ACADEMIC PROJECTS:

CASE STUDY ON STRUCTURAL PROVISION AND BEHAVIOUR OF A CANTILEVER RC SLAB WITHOUT BACK-SPAN SUPPORT

PG Case-study | July 2026 – November 2026

- Investigated the structural behaviour of a slender RC column following beam removal in a G+2 building.
- Evaluated potential changes in load transfer, column stability and structural performance.
- Studied structural deficiencies and suitable retrofitting techniques.
- Explored strengthening solutions to improve structural safety and stability.

LEAD REMOVAL BY ELECTROCOAGULATION PROCESS

UG Research Project | Feb 2023 – May 2023

- Investigated the removal efficiency of lead from wastewater using the electrocoagulation process.
- Studied the effectiveness of the treatment process in reducing lead contamination in wastewater.
- Evaluated the potential of electrocoagulation for minimizing water pollution and its harmful effects on aquatic ecosystems and human health.

COMMUNITY HALL BUILDING

UG Mini-Project | Sep 2023 – Jan 2023

- Prepared preliminary building plans and structural drawings using AutoCAD.
- Developed a structural model and performed load evaluation using STAAD.Pro.
- Applied basic structural analysis concepts to assess the behaviour of building components under applied loads.
- Gained practical exposure to structural modelling, load assessment and engineering drawing preparation
